

1 **51094/GSL/E87**

ABSTRACT OF THE DISCLOSURE

5 A test module used to verify the correct placement of
light-emitting devices on electronic assemblies, by performing
color and luminous intensity tests on these devices. The
module includes one or a number of color sensitive
photodiodes, which when exposed to light coupled from the
10 emitter under test, will accurately measure the intensity, as
well as the true color emitted by the device. The test module
outputs analog signals, one directly proportional to the
intensity, a second voltage proportional to the spectral
wavelength of the device under test.
